The Future of Black Hole Imaging

Monday, December 11, 2023 10:50 AM (50 minutes)

The Event Horizon Telescope images of M87 and Sgr A have opened a new era of resolved imaging of black holes at the event horizon scale. I will describe how EHT measurements are made, how they can be interpreted with the aid of state-of-the-art models, what they teach us about black holes, and what the prospects are for future experiments.
