LHAASO observations of the BOAT GRB 221009A

Friday, 15 December 2023 08:40 (25 minutes)

In this talk, I will report the observations of the TeV emission from the brightest-of-all-time GRB 221009A by the Large High Altitude Air Shower Observatory (LHAASO). I will also present our understanding of the TeV and multi-wavelength afterglow emission of this unusual GRB.
