

## Charmed baryon decays at BESIII

*Tuesday, 13 May 2025 15:10 (35 minutes)*

Based on the  $4.5 \text{ fb}^{-1}$   $\Lambda_c^+$  pair threshold data between 4.6 and 4.7 GeV collected with BESIII, many results have been achieved experimentally. In this talk, we will present some highlight measurements including both of the  $\Lambda_c^+$  hadronic decays and semi-leptonic decays.
