

The TRIDENT Winter Collaboration Meeting of 2025

Thursday, 20 November 2025 - Saturday, 22 November 2025

Tsung-Dao Lee Institute

Book of Abstracts

Contents

Welcome & Project Overview	1
Welcome & Project Overview	1
Recent progress on the development of Trident SPIDER	1
Recent progress on floating power buoy design	1
Recent progress on floating power buoy design	1
A web-based construction method of deepsea neutrino telescope	1
Aging research on vertical dynamic cable	1
Single string overview	2
Status on TRIDENT timing system	2
Status on data acquisition software	2
Data Monitor Status	2
single string joint test	2
PMT test progress	2
Progress on PMT base with HV boosting	2
Progress on SiPM readout electronics	2
A 16-Channel Fast-timing ASIC for Large-area SiPM Arrays Readout in the TRIDENT Experiment	3
Tracing solar modulation thorough Ice Cherenkov Observations and Yield Function Analysis	3
Modeling Cosmic Rays from the Atmosphere to Interplanetary Space	3
TRIDENT Simulation Overview	3
Detecting the Next Galactic Core-Collapse Supernova with TRIDENT	3
Projected DM detection sensitivity	3
Progress on CORSIKA8	3

TREX2024 mDOM Analysis	4
TREX2024 Camera Analysis	4
Energy Reconstruction	4
Track–Cascade Event Classification Method Based on Time Information	4
Cascade reconstruction in phase 1	4
4 inch PMT DOM sim	4
DOM Radioactivity Measurement and Sim	4
Gel Pad R&D	4
Calibration Overview	5
Optical Calibration	5
Time Calibration	5
Bioluminescence	5
APS and sound speed profile	5
Bioluminescence	5
Bioluminescence	5
APS and sound speed profile	6
Recent progress on the development of Trident SPIDER	6
Single string overview	6
Status on TRIDENT timing system	6
Status on data acquisition software	6
Coffee Break	6
Data Monitor Status	6
Single string joint test	6
PMT test progress	7
Progress on PMT base with HV boosting	7
Progress on PMT base with HV boosting	7
A 16-Channel Fast-timing ASIC for Largearea SiPM Arrays Readout in the TRIDENT Experiment	7
Development Progress of the Ultrasonic Localization Interface Module	7

Tracing solar modulation thorough Ice Cherenkov Observations and Yield Function Analysis	7
Modeling Cosmic Rays from the Atmosphere to Interplanetary Space	7
TRIDENT Simulation Overview	8
Detecting the Next Galactic CoreCollapse Supernova with TRIDENT	8
Projected DM detection sensitivity	8
Recent development related to Corsika8	8
TREX2024 mDOM Analysis	8
TREX2024 Camera Analysis	8
Energy Reconstruction	8
ReconstructionTrack–Cascade Event Classification Method Based on Time Information .	9
Cascade reconstruction in phase 1	9
4 inch PMT DOM sim	9
DOM Radioactivity Measurement and Sim	9
Gel Pad R&D	9
Acoustic Positioning System Overview	9
APS simulation	9
Recent Progress in the Electronics of the Acoustic Positioning System	9
Method for Acoustic Ray Correction in Underwater Positioning of Deep-Sea Neutrino Tele- scopes	10
C-string prelim design review	10
Review Q&A	10
Decoding Ocean Life through Light Spectra	10

94

Welcome & Project Overview

Speaker: Donglian XU

95

Welcome & Project Overview

Speaker: Donglian XU

96

Recent progress on the development of Trident SPIDER

Ocean Engineering / 97

Recent progress on floating power buoy design

Ocean Engineering / 98

Recent progress on floating power buoy design

Ocean Engineering / 99

A web-based construction method of deepsea neutrino telescope

Corresponding Author: tianxinliang@sjtu.edu.cn

Ocean Engineering / 100

Aging research on vertical dynamic cable

Corresponding Author: feiliu@sjtu.edu.cn

Ocean Engineering / 101

Single string overview

Corresponding Author: mei.hualin@sjtu.edu.cn

Ocean Engineering / 102

Status on TRIDENT timing system

Ocean Engineering / 103

Status on data acquisition software

Ocean Engineering / 104

Data Monitor Status

Ocean Engineering / 105

single string joint test

Corresponding Author: a2427840984@163.com

Ocean Engineering / 106

PMT test progress

Corresponding Author: shaohengbin1124@sjtu.edu.cn

Ocean Engineering / 107

Progress on PMT base with HV boosting

Ocean Engineering / 108

Progress on SiPM readout electronics

Ocean Engineering / 109

A 16-Channel Fast-timing ASIC for Large-area SiPM Arrays Read-out in the TRIDENT Experiment

Neutrino physics&astronomy / 110

Tracing solar modulation thorough Ice Cherenkov Observations and Yield Function Analysis

Neutrino physics&astronomy / 111

Modeling Cosmic Rays from the Atmosphere to Interplanetary Space

Neutrino physics&astronomy / 112

TRIDENT Simulation Overview

Corresponding Author: iblake@tcd.ie

Neutrino physics&astronomy / 113

Detecting the Next Galactic Core-Collapse Supernova with TRIDENT

Corresponding Author: ruike_cao@sjtu.edu.cn

Neutrino physics&astronomy / 114

Projected DM detection sensitivity

Corresponding Author: yingweiw@sjtu.edu.cn

Neutrino physics&astronomy / 115

Progress on CORSIKA8

speaker: CORSIKA8

Electronics&DAQ / 116

TREX2024 mDOM Analysis

Corresponding Author: zhangfydphy@sjtu.edu.cn

Electronics&DAQ / 117

TREX2024 Camera Analysis

Corresponding Author: rth033412291989@sjtu.edu.cn

Electronics&DAQ / 118

Energy Reconstruction

Corresponding Author: tdli.hjt@sjtu.edu.cn

Electronics&DAQ / 119

Track–Cascade Event Classification Method Based on Time Information

Electronics&DAQ / 120

Cascade reconstruction in phase 1

Electronics&DAQ / 121

4 inch PMT DOM sim

Corresponding Author: shaohengbin1124@sjtu.edu.cn

Electronics&DAQ / 122

DOM Radioactivity Measurement and Sim

Electronics&DAQ / 123

Gel Pad R&D

Detector simulation&reconstruction / 124

Calibration Overview

Corresponding Author: tailinzhu@hotmail.com

Detector simulation&reconstruction / 125

Optical Calibration

Corresponding Author: rth033412291989@sjtu.edu.cn

Detector simulation&reconstruction / 126

Time Calibration

Detector simulation&reconstruction / 127

Bioluminescence

Corresponding Author: tailinzhu@hotmail.com

Detector simulation&reconstruction / 128

APS and sound speed profile

Detector simulation&reconstruction / 129

Bioluminescence

Corresponding Author: tailinzhu@hotmail.com

Detector simulation&reconstruction / 130

Bioluminescence

Corresponding Author: tailinzhu@hotmail.com

Detector simulation&reconstruction / 131

APS and sound speed profile

Ocean Engineering / 133

Recent progress on the development of Trident SPIDER

Detector Hardware / 134

Single string overview

Corresponding Author: mei.hualin@sjtu.edu.cn

Detector Hardware / 135

Status on TRIDENT timing system

Corresponding Author: ggh@tsinghua.edu.cn

Detector Hardware / 136

Status on data acquisition software

Corresponding Author: sjtu_wp@sjtu.edu.cn

Detector Hardware / 137

Coffee Break

Detector Hardware / 138

Data Monitor Status

Corresponding Author: zyw3171@sjtu.edu.cn

Detector Hardware / 139

Single string joint test

Corresponding Author: a2427840984@163.com

Detector Hardware / 140

PMT test progress

Corresponding Author: shaohengbin1124@sjtu.edu.cn

Detector Hardware / 141

Progress on PMT base with HV boosting

Detector Hardware / 142

Progress on PMT base with HV boosting

Detector Hardware / 143

A 16-Channel Fast-timing ASIC for Largearea SiPM Arrays Read-out in the TRIDENT Experiment

Detector Hardware / 144

Development Progress of the Ultrasonic Localization Interface Module

Physics & Simulation / 145

Tracing solar modulation thorough Ice Cherenkov Observations and Yield Function Analysis

Physics & Simulation / 146

Modeling Cosmic Rays from the Atmosphere to Interplanetary Space

Physics & Simulation / 147

TRIDENT Simulation Overview

Corresponding Author: iblake@tcd.ie

Physics & Simulation / 148

Detecting the Next Galactic CoreCollapse Supernova with TRIDENT

Corresponding Author: ruike_cao@sjtu.edu.cn

Physics & Simulation / 149

Projected DM detection sensitivity

Corresponding Author: yingweiw@sjtu.edu.cn

Physics & Simulation / 150

Recent development related to Corsika8

Corresponding Author: weilunh@sjtu.edu.cn

Simulation & Data Analysis / 151

TREX2024 mDOM Analysis

Corresponding Author: zhangfydphy@sjtu.edu.cn

Simulation & Data Analysis / 152

TREX2024 Camera Analysis

Corresponding Author: rth033412291989@sjtu.edu.cn

Simulation & Data Analysis / 153

Energy Reconstruction

Corresponding Author: tdli.hjt@sjtu.edu.cn

Simulation & Data Analysis / 154

ReconstructionTrack–Cascade Event Classification Method Based on Time Information

Simulation & Data Analysis / 155

Cascade reconstruction in phase 1

Simulation & Data Analysis / 156

4 inch PMT DOM sim

Corresponding Author: shaohengbin1124@sjtu.edu.cn

Simulation & Data Analysis / 157

DOM Radioactivity Measurement and Sim

Simulation & Data Analysis / 158

Gel Pad R&D

Underwater acoustic positioning / 159

Acoustic Positioning System Overview

Underwater acoustic positioning / 160

APS simulation

Underwater acoustic positioning / 161

Recent Progress in the Electronics of the Acoustic Positioning System

Underwater acoustic positioning / 162

Method for Acoustic Ray Correction in Underwater Positioning of Deep-Sea Neutrino Telescopes

Underwater acoustic positioning / 163

C-string prelim design review

Corresponding Authors: tailinzhu@hotmail.com, rth033412291989@sjtu.edu.cn

Underwater acoustic positioning / 164

Review Q&A

Simulation & Data Analysis / 165

Decoding Ocean Life through Light Spectra
