

# NuFact 2026 - The 27th International Workshop on Neutrinos from Accelerators

Tuesday, September 1, 2026

WG3+WG4 — Muon Sources & Beams (2:00 PM - 3:40 PM)

| time    | [id]  | title                                                                                                              | presenter      |
|---------|-------|--------------------------------------------------------------------------------------------------------------------|----------------|
| 2:00 PM | M16]  | Status and future plans for the Muon Source Program at HIAF                                                        | CHEN, Liangwen |
| 2:25 PM | M100] | Design and Optimization of a Heavy-Ion-Driven GeV Muon Beamline at HIAF                                            | ZHU, Ruihu     |
| 2:50 PM | M71]  | COMET Phase- $\alpha$ : Validation of the Muon Transport System for a Muon-to-Electron Conversion Search at J-PARC | OISHI, Kou     |
| 3:15 PM | M112] | Current Status of the High-Repetition-Rate Electron-Driven Pulsed Muon Source at the SHINE Facility                | Mr NG, Jun Kai |
